

# Welcome to Albany Creek Skateaway

## Learn to Skate and Blade Class

The Saturday morning Skateaway Star class program has four levels, commencing at the very basic level and gradually moving through to the more involved technical skills of quad and blade skating.

- ◆ Beginners, Level 1, Level 2 & 3
  - ◆ Level 4
- Saturday mornings 9am-10am  
Saturday lunchtime 12noon-1pm

All levels are suitable for people of all ages and fitness on blade or traditional quad skates. In addition to the star levels, we conduct two additional specialized groups, one is for first time or beginner skaters, and the other group is a separate area for adults. Both of these groups are incorporated in the Saturday morning Learn to Skate Class. As part of the admission fee for either class (morning or lunchtime), skaters will be invited to skate the Saturday morning session **FREE OF CHARGE**

Every 6-8 weeks we conduct testing for star levels 1-4 and the successful skaters will receive a patch and move up to the next star level. Testing for the beginner level is completed weekly and skaters will receive a patch upon completion of this level also.

Once you have completed the four star program, skaters can then move into the Artistic Development Program (figure skating classes) which is conducted on Saturdays between 12.30-2pm. If you are interested in finding out more information regarding Figure (Artistic) skating or hockey, please feel free to ask your Session Manager or your Star Class Instructor.

Your Star Class Co-ordinator and Lead Instructor, Jodie Johnson-Garufo, is a fully qualified level two accredited roller skating teacher. Jodie and her team of competent instructors will ensure you learn important skating skills and techniques whilst still having fun!

We are here to help you learn and enjoy your Roller Skating/Blading experience. If you have any question or require further information at any time, please do not hesitate to see on of the instructors. Jodie is available during and after the Star Class on Saturday mornings.
